FRP/GRP

1 B FTP BL XS Series

FRP/GRP Boltless XS Bag Housings

Premium Quality Standards in our most Compact FRP Housings

- FULLY CORROSION RESISTANT
- UV PROTECTION FOR OUTDOORS INSTALLATION
- QUICK & EASY CARTRIDGE REPLACEMENT
- UP TO 16 BAR DESIGN PRESSURE
- 1 PP BAG ELEMENT DOUBLE LENGTH

Design

Fluytec's FRP/GRP Cartridge Filters are engineered to operate in heavy duty applications, providing superb filtration efficiency and durability. Fluytec's continuous development allows introducing new features and functionalities to our products.

FTP BL XS Series have been designed to satisfy the highest technical requirements os small capacity projects, providing a High Quality Standard option with the competitiveness of Fluytec's FRP housings.

The Boltless XS filters are designed and manufactured according to the ASME X design code. Design pressure is up to 16 Bar for all these models, and the Hydrostatic Tests are performed at 1,43 times the Design Pressure.

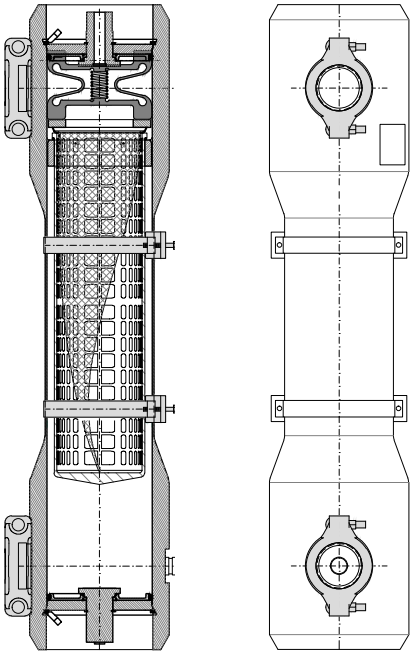

Bag Elements Installation

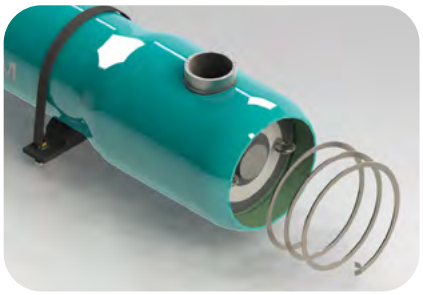

"Bag Filter Elements" fixing is extremely rapid and easy.

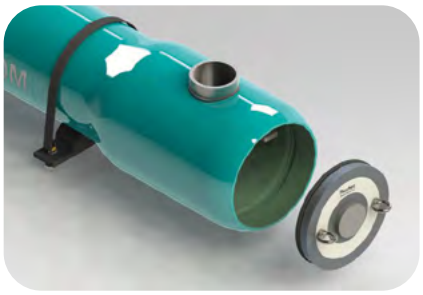

Opening the filter housing and extracting the cartridge takes only three simple steps: Taking out the retaining ring, the lid, and a special piece called "H Spring".

The H spring ensures the perfect sealing of the basket in false bottom plate.

Filtration is FITO/ Inside-Out flow pattern, capturing and retaining all contaminants inside the bag element, preventing dirt release at cartridge changing operations.
